Just to be definite, and to update the agenda, the SAC will telecon next Thursday, 30 Oct 1-3p EDT.

1. Formal adoption of Magellan Instrument Procedures and Policies (Rev. Mar 15 2007, attached). - All
2. Results of the first f/5 engineering run - Uomoto, Perez, Phillips, Osip.
3. MMFS2 - Mateo
4. Community response to removing LDSS3 from facility service - Szentgyorgyi, Phillips, ????
5. Evolving role of the SAC - TBD.

I'm hoping item 1. will only take a minute or two.
We need to march through item 2. Mario promises item 3. is a 15 minute presentation. Item 4. could run on a bit, but this is a 2 hour (maximum) meeting. If we don't get to 5. it can keep until later on.
