

## Proposed 6 port plan:

- 1) a maximum of 6 f/11 ports are supported by mountain staff;
- 2) a maximum of 5 f/11 facility instruments are supported by mountain staff;
- 3) PI instruments and instruments being commissioned may be mounted on whichever f/11 port has (first) the least negative impact on the mountain staff and (second) the most positive impact on science and instrument development;
- 4) mountain staff will impose limits on PI instrument changes as appropriate.
